

The Powerheart G5: designed for you.

Ready when you need it.

No compromises.

The first AED that combines variable escalating energy and fast shock times, delivering a post-CPR shock in as little as 10 seconds.

Rely on the Powerheart G5's advanced AED technology.

Your skills and experience can make all the difference to a victim of sudden cardiac arrest, so we designed the Powerheart® G5 to help you respond as quickly and effectively as possible. The Powerheart G5 is the first AED that combines variable escalating energy for customised patient therapy along with fast shock times and real-time CPR feedback. Like you, the Powerheart G5 is ready to respond and knows how to perform when every second counts. And with customisable protocols and easy USB data transfer, it's the perfect addition to your team.

In your locale.

Count on responsive support and expert training from your local Cardiac Science team.

Incredibly smart.

Provides customised therapy with variable escalating energy and synchronized shock to treat a variety of patients and arrhythmias. Switch to an alternate language* during a rescue with the push of a button, and quickly transfer rescue data via USB.

Rugged and reliable.

Ready to go whenever you need it with a durable design tested to military standards and an IP55 rating for protection from dust and water. The highly visible Rescue Ready® indicator confirms your G5 passed rigorous daily, weekly, and monthly self-tests.

Intuitive CPR guidance.

Real-time feedback helps responders perform CPR in accordance with the latest Resuscitation Guidelines.

Customisable now, flexible in the future.

Customise the prompts, shock protocols, and CPR feedback to match user skills and preferences, and easily update these settings if Resuscitation Guidelines change.
